## PROJECTS

### House Price Prediction Using Machine Learning

Explores the utilization of machine learning regression algorithms for predicting house prices. The primary aim is to develop a robust model capable of accurately estimating house prices based on diverse features such as square footage, bedroom/bathroom count, location, and amenities.

### AI Enabled Battery Management System

An AI-enabled Battery Management System uses machine learning and advanced algorithms to optimize battery performance, enhance safety, and predict maintenance needs in real-time. It intelligently manages charging, discharging, and thermal conditions for extended battery life and efficiency.

### Hospital Management System

The Hospital Management System (HMS) is a centralized platform designed to streamline hospital operations such as patient registration, appointment scheduling, billing, EMR, pharmacy, lab, and inventory management. It enhances efficiency, reduces errors, and improves patient care.

Technologies Used:

Front-end: HTML, CSS, JavaScript, React.js

Back-end: Node.js, Java (Spring Boot)
